

Company Profile

Mission

Our goals are:

1. to provide reliable and productive world class equipment and technology
2. to keep our employees motivated and productive
3. to keep our company progressive with a tradition of excellence, quality and efficiency

Innovations

Graficad Creation, Inc. is an advanced application and technology company that has established itself as a market leader within the sign and graphic industry. It now offers a near complete sign business solution and cutting-edge equipment that are efficient and cost effective.

Our Research and Development team continuously seek innovations to keep clients updated and competitive in the industry. We are continuously compiling complete package line-ups to suit sign business needs and remain abreast with the latest technology in the changing trends of the industry.

Every product runs through series of tests to ensure quality and reliability.

We have successfully introduced many low cost alternatives that yield high quality products in response to the high cost machines.

Achievements

Marking its name in the industry, Graficad continues to find ways in introducing many firsts in the sign business industry. It introduced Laser Pro Laser Engraving Machine into the Philippine market in 1999. Being the pioneer in the laser engraving industry, we have compiled the know-how and technique in laser engraving and cutting which we unselfishly share to our valued clients, as part of our commitment in providing total customer support. Since its introduction, Laser Pro continues to be the top selling brand in the Philippine market.

On November 2004, Graficad successfully introduced the first Low Cost ID Card Maker, achieving our goal of providing quality products at affordable costs.

On June 2006, Graficad introduced Sable and Jaguar cutting and plotting machines, providing clients with options for affordability, reliability, efficiency and versatility.

When the latest line of Crystal Images was released last December 2006, clients were introduced to producing low cost photographic crystal pieces.

Early 2007, we introduced the XtremePress Cap Press and added a new collection of XtremePress Dye Sublimation Package which the market warmly received, in time for the demand on campaign materials for the election period.

Late 2008, K-jet large format printer, with Konica printheads and eco-solvent based inks, were included in our printer line-ups.

Last 2009, a successful open house for the latest trend in t-shirt industry, Siser Thermo Transfer from Italy, was launched.

After more than a decade of being one of the top advertising equipment provider in the country, GCI continues to be reliable in providing customer support and market-tested durable products.

Total Commitment

As much as we are determined to sell, we have committed ourselves to dedicate full customer satisfaction thru innovations to customer education and assistance.

Every product we sell comes with free training for clients to skip the trial and error process and ensure success with productivity.

We don't offer franchise packages, as we believe that you should be the boss of your own business.

We provide specialize training & orientation of products to our customers, supported by our team of highly trained engineers and graphic designers that shall provide full technical support and up-to-date technical information.

Our technical engineers are on standby for assistance, while our customer service staffs are ready to tend to your concerns.

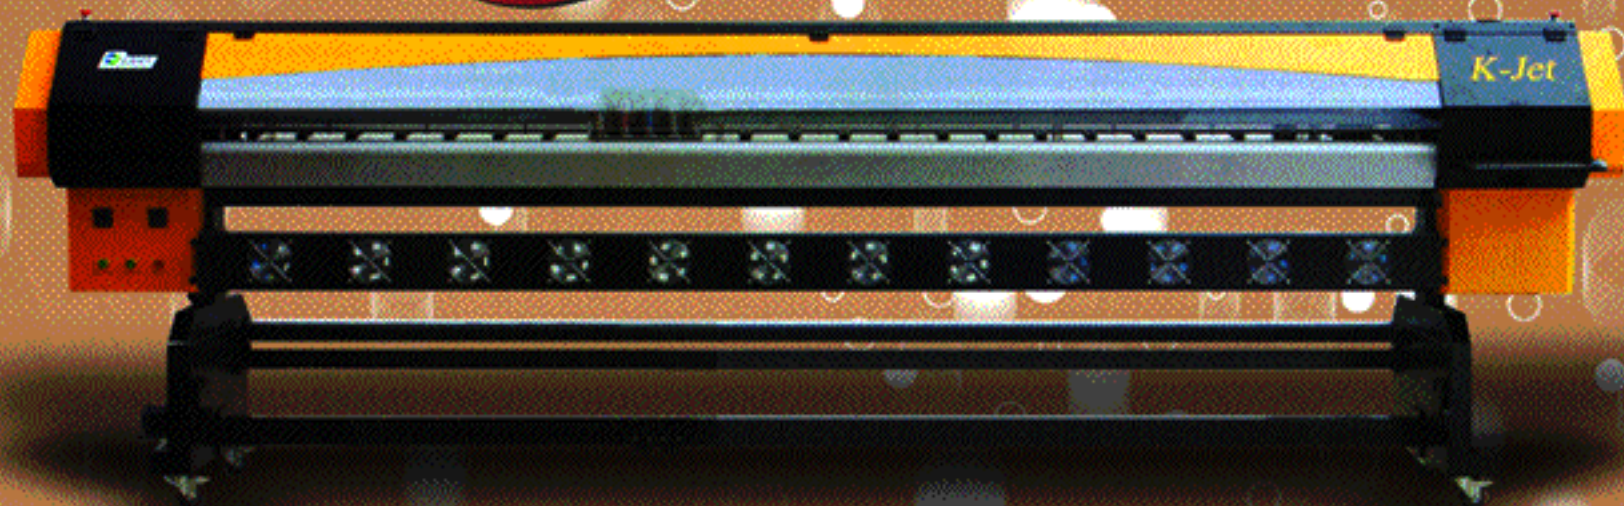

Graficad commits full assistance, without tying the knot.

K-Jet

Why should I choose Laser Pro over low cost China made laser machines?

(1) **Safety features** - Laser Pro has several safety features that are certificated and tested by CE and FCC for laser and electronic operation safety. In addition, the LaserPro laser system achieves CDRH (Center for Devices and Radiological Health) IIIA safety criteria.

(2) **Cutting capability & fine details**- The LaserPro laser engraver is good at controlling the motion system and laser driver to achieve cutting of thicker acrylic than any other comparable laser tube wattage. Details are well defined.

(3) **Worldwide LaserPro distributors** — LaserPro has over 60 distributors worldwide in over 50 countries. You can always get warm and immediate support from local LaserPro distributors.

(4) **Experienced and reliable manufacturer** — Several thousand LaserPro laser engravers have been installed worldwide in the past years, and LaserPro has been one of the two major players in the worldwide market. Over 8% of sales are invested in R&D each year for development.

(5) **Stable laser tube** — Laser tube is the soul of a laser system. The LaserPro laser engraver is equipped with the most reliable, long- life laser source with superb beam quality and stable laser output. Quality and performance is always our goal.

(6) **Total solution** — LaserPro not only offers a full range of features in a laser system, but also provides various optional items, including air compressors, odor reduction systems, honeycomb tables, etc. containing specially designed features for laser applications. You have one-stop shopping with LaserPro.

(7) **Complete product range** — From 12 Watt to 200 Watt laser source options, 18" x 12" to 49.6"x 36.6" working area size, 20ips to 80ips engraving speed, LaserPro offers you versatile and complete laser system choices.

(8) **Powerful 3D and stamp engraving** — LaserPro has developed its own laser driver to control the laser system. Its 3D stamp engraving features have been specially developed to fit customers' unique applications.

(9) **Global Resource, Global Advantage** — LaserPro utilizes global resources and advantages to create the LaserPro laser engraver, DC servo motors, linear systems from Japan, laser tubes and optics from the US, electronics and professional manufacturing capability from Taiwan, worldwide branch offices (America, China, and Europe) and local distributors network support. LaserPro provides you unprecedented value and outstanding performance.

Features:

- Sealed CO2 Laser
- Class 3A for Red Pointer

1. What is the package capable of?

If you are familiar with shirts sold in malls either in unique tribal designs or the ones sold by popular and expensive brands, then, you can easily do them with this package. Simple shirts can be turned into elegant looking shirts and sold at high prices.

It is available in electric, metallic, glitter & stripflock, which can not be done by silk screen.

2. What else can it produce?

The two machines are capable of doing different things.

Flatbed heatpress can also be used on puzzles, mousepads, coasters and other flat items, in combination with other materials like inks and transfer papers.

Expert 24LX cutter plotters are usually for cut-out stickers used as signages, building directories, car decals, personalized items, etc. Either vinyl or reflectorized stickers are used. Some examples are signages of fastfood chains, bus stops, street, door and exit signs, etc

3. Where is it from and how am I assured of the machine quality?

a. **Xtremepress** is our own OEM from China, backed with 13 years of experience. Machines ran through a series of tests before they are released to the market.

b. **Siser thermo transfer** is from Italy, backed with 42 years of experience. It is currently recognized as a leading company in the production of heat transfer materials for applications on fabrics.

c. **Expert 24LX** is from Taiwan, backed with 23 years of experience. It is from one of the most stable company in Taiwan, which received various excellence awards for quality and has established different offices worldwide.

4. How am I assured of the output quality?

a. Reliability - Aesthetic characteristics of materials maintained: Colour fastness and washing resistance; customers are assured of the same tonality of colours even after long periods of time and many washes. Materials soft "hand" after transferring and washing. All these characteristics are always verified - tested constantly on raw materials and production processes.

b. Grip - Thanks to specific designed adhesives formulated to work on specific materials, Siser S.r.l. guarantees a perfect bond for these products.

c. Tests - All Siser materials are tested for strength and endurance both in laboratories and through network of customers.

d. Ease of use - All Siser products are specifically designed to offer simplicity and speed during application, allowing customers to optimize work time.

5. Why should we buy from you?

a. Quality products are assured.

b. We will provide you with free training on machine operation and maintenance upon buying.

This is important for you to skip the trial and error process, saving you time and money.

c. One year warranty for machine parts and service, except for blades, consumables, etc. We often encounter clients who bought from unknown vendors, only to regret not having any technical or after sales service support. Sometimes, you can not get the best out of the product because you do not know how to use it. Oftentimes, unknown machines break even before you have the chance to fully utilize the products.
